SUMMARY

I'm a Front-End developer with a strong academic background and practical experience in implementing new systems and software. I'm skilled at managing multiple tasks, prioritizing work streams, and delivering robust solutions. I'm passionate about developing products that positively impact people and the environment. By expanding my skillset and learning new technologies, such as TypeScript, I'm committed to delivering cutting-edge solutions that exceed industry standards and support your mission to connect technology companies with their customers.

TECHNICAL SKILLS

Technical Languages: JavaScript | TypeScript | jQuery | React Js | Node Js | Express | MongoDB | Material UI | Bootstrap | Git | GitHub

Applications:

PROJECTS

Warehouse Planning Tool
- Full Stack application designed to help to forecast daily demand.
- Role: Sole author responsible for designing and implementing the UI and UX
- Technologies: **React, TypeScript, Node Js, Express, MongoDB**, **Material Ui, Firebase Auth, Recharts, react-countup**.
- **[GitHub Repo](https://github.com/AleksandrRiabov/wpt)** https://github.com/AleksandrRiabov/wpt
- **[Deployed Project](https://warehouse-planning-tool.onrender.com/)** https://warehouse-planning-tool.onrender.com/

React Movies App
- React App, which uses a real API to display movies.
- Role: Sole author responsible for designing and implementing the UI and UX
- Technologies: **React, Material UI, Axios, API.**
- **[GitHub Repo](https://github.com/AleksandrRiabov/movies)** https://github.com/AleksandrRiabov/movies
- **[Deployed Project](https://aleksandrriabov.github.io/movies)** https://aleksandrriabov.github.io/movies

RWCFrance23 (Rugby World Cup France 2023)
- A collaborative project to create an application using react that informs users about the Men's Rugby World Cup in France 2023.
- Role: Develop key components of the React application, including the Matches page, Shop component, Navbar and Timer, as well as React routing and API calls
- Technologies: **React, React-Bootstrap, React-Router, Material Ui, Moment.js, Leaflet.js**
- **[GitHub Repo](https://github.com/AlanaBF/RWCFrance23)** https://github.com/AlanaBF/RWCFrance23
- **[Deployed Project](https://rwcfrance23.netlify.app/#/matches)** https://rwcfrance23.netlify.app/#/matches

Export Clerk 2010 – Present **Morrisons Retail Distribution Centre (UK)**
Sittingbourne, Fleet End

- Successfully completed supporting documents for more than half a million cases per year to be shipped and delivered to Gibraltar under EU legislation, resulting in 100% compliance with regulations and no penalties.
- Supported the daily operations of the team by processing deliveries to Gibraltar, resulting in improved efficiency and on-time delivery.
- Established strong lines of communication with customs officials, resulting in successful clearance of deliveries and minimal delays.
- Managed and prioritized large workloads, proactively resolving any issues that arise, resulting in a smooth and efficient export process.
- Personally designed and embedded an "Export Planning Tool" which helped forecast daily demand, resulting in better planning and resource allocation.
- Simplified the process for estimating the number of daily trailers required, resulting in cost savings for the company.

Implementation Assistant
Appointed to work within the Implementation Team to embed the Oracle Retailer Warehouse Management Systems:

- Supported numerous sites during the implementation and hyper-care period, resulting in the successful roll-out and adoption of the new system.
- Created implementation strategies, resulting in a clear and effective plan for implementation.
- Assessed anomalies between new and old systems and troubleshoot the issues, resulting in minimal disruptions to operations.
- Embedded strong best practice procedures into an operational environment, resulting in improved processes and efficiency.
- Identified opportunities to improve processes, resulting in continuous improvement and cost savings for the company.

EDUCATION

Mastering TypeScript 2023 Edition (Udemy)

Completed: 2023

TypeScript.

Front-End Web Development Bootcamp, edX in association with the University of Birmingham.

Completed: 2023

A 16-week intensive program focused on gaining technical programming skills in

HTML5, CSS3, JavaScript, JQuery, Bootstrap, React, Node.js, Git, and GitHub.

The Web Developer Course (Udemy)

Completed: 2022

React, Node.js, MongoDB, Express.
